2. The following is an examiner's statement of reasons for allowance: The prior art of references fails to disclose or suggest a drill bit having two nozzle receptacles that are formed by the bit body as specifically recited in the claimed combination. It is noted that both Nguyen et al. and Larson et al. (as applied in the previous Office Action) teach multiple nozzle receptacles however the receptacles are attached to the bit body after the bit body is formed and thus are not formed by the bit body itself.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
